Art Unit: 2446

Detailed Action

Claims 2-7, 9, 11-18, 20-24, 26, 28-41, 43-46, 48, 50, 51, 61-82 and 84-90 are pending in this Office Action.

Drawings

The drawings are objected to as being sloppy, unclean and illegible hand written drawings. Appropriate correction is required.

Allowable Subject Matter

Claims 2-7, 9, 11-18, 20-24, 26, 28-39, 45-46, 48, 50, 51, 61-66, 69-82 and 84-86, 88-90 are allowable over the prior art because they include the limitations of previously objected claims.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 40-41, 43-44, 67-68, 87 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The computer program product is embodied on a computer readable medium. Said medium is interpreted to include non-statutory subject matter such as carrier waves, signals, and communication media because carrier waves, signals, and communication media store data within the wave, signal or media. While the specification lists examples "such as" on page 13, 1st paragraph of physical media, those are considered to be just non-limiting examples. The examiner encourages applicant to amend the

Art Unit: 2446

claims and specification with explicit arguments that the medium is 'non-transitory' or 'non-transmissible.'

Remarks

Attempts to contact the applicant were unsuccessful in order to expedite prosecution.
